RELEVANT EXPERIENCE

PayPal San Jose, CA

Software Engineer Intern

May-August 2016

With the Kraken.js team, I developed and maintained the Node.js infrastructure for internal applications as well as open source projects.

Software Engineer Intern

May-August 2015

With the Next-Gen Commerce team, I worked closely with leadership in a lean, fast-paced environment to integrate with high-profile partners and prototype next-gen products, using technologies such as Node.js, AngularJS, and Backbone.js.

Pitt Quantum Repository Pittsburgh, PA

Software Developer

January 2016-present

With the University of Pittsburgh Chemistry Department, I developed the web frontend for the online molecular structure database, utilizing jQuery, Three.js and WebGL.

OThot Pittsburgh, PA

Software Developer

December 2014-January 2015

With the budding big-data startup, I prototyped the frontend data-visualization MVP for investors and developed the foundation for the long-term product, using such technologies as: Node.js, AngularJS, D3, and jQuery.
